

New Zealand Diploma in Primary Industry Business Management

Level 5

primaryito.ac.nz | 0800 20 80 20

Growing your expertise

Are you looking to enhance your career, or fill specific gaps in your business skills?

Gain in depth understanding of the core elements and functions required to effectively manage a successful primary industry business in today's changing environment with the NZ Diploma in Primary Industry Business Management (Level 5).

Courses to suit you

Courses are run via Zoom, so you won't need to travel to take a course. With experienced tutors, the interactive discussions and content will be relevant to you and your business.

- It is an applied diploma with learning that relates directly to a functioning primary industry business. You will use your own workplace or a business you are familiar with as a case study which means you will develop skills that you can put into practice straight away.
- Sessions are designed to fit around a typical workday in a primary industry business.
- You can take one course over 9 weeks to develop a specific skill, or work towards the full diploma which will take 2-3 years part-time to complete.
- Once you've completed this diploma, you'll come out with an industry recognised qualification and a transferable skill set.

Entry requirements: Learners need to have access to a functioning primary industry business, including financial records, production data, and a property/physical environment to evaluate. Some staff management responsibilities are preferred but not essential.

Topics

- Analyse physical, financial and human resources for a primary industry organisation.
- Evaluate opportunities for the future strategic direction of a primary industry organisation.
- Produce and present a primary industry business report.

**Completion of prerequisite courses is an entry requirement for this final course.

“Because I lead the business decisions, I need to know how to manage staff and budgets. This has given me so much confidence in these areas to achieve better outcomes.”

Phillip Dight, Wine Growing

“That is money out of my pocket so I want to know what is happening, why are we doing that and what does it cost? Now I have the skills to assess that.”

Sian Madden, Dairy Farming

“The financial, human resources and business planning learning apply to all agricultural industries equally. The only difference is that our farm is on the water and they are farming on the ground. You use the same dollars, you deal with the same people and the complexity of operations has many things in common.”

Salvador Delgado Oro Laprida, Aquaculture

“It has helped me to be more up to date with cash-flow and budgeting and with decisions on what to do and where to spend money in the business. It also helps you know where you are going”

Scott Adams, Sheep and Beef & Viticulture

Industry Recognised
